

Golf & Cemetery Board Meeting

September, 13th 2021

Cemetery

August Funerals 11 YTD 93

- Monument in the infant section in block 1 will be started soon. The granite monument on top is already pulled off, and the brick is on sight.
- Fall seeding will be done next week.
- Jon is getting broke in on all the different things that we do.
- The work on the digital cemetery is started. The city has set the control points.

Golf

- Aerification of greens on 23rd and 24th.
 - Very happy with how they healed.
 - Aerification of tees and fairways this fall.
 - Verticutting of greens took place this week, and we plan on two more times this fall with some top dressing in conjunction.
 - Will set tentative dates for next year so events can be planed around aerification.
- Skunks have been after grubs on the fairways that were not treated over the last month.
 - We have treated more fairways, and have done some trapping to thin the population.
- Seeding projects will be done shortly.
- I have been doing research on Zebra mussel's effect on irrigation systems. They will be a fact of life going forward. It is just a matter of how much regular maintenance will be needed.
- Evaluating options for possible extra money that may be available.
 - Options for this money are staff, equipment, or projects. There is need for all these areas.
- Marked the trees that will be coming down this winter because of dead or dying. More will be done in conjunction with the master plan.
- Will be working on some tee boxes and other projects as time permits.

Jason Gunnare Superintendent
