

Airport Report December 2021

Snow removal operations were completed for the month. Airfield lighting repairs , runway inspections and winter weather advisories were maintained throughout the month. All equipment received regular scheduled maintenance and repairs. The airport received the 2022 Operating License through the DOT Aeronautics. NWPS is nearing completion of several major updates at the airport. This includes removal /replacement of main power lines now underground , new transformers and updates to switch-gear. An onsite meeting was held on December 15th with the DOT aeronautics to inspect and estimate quantities for the planned 2022 pavement maintenance updates at the airport. We are hoping to complete crack sealing and seal-coat applications to all hangar/way taxiways this fall. This project will be completed under the DOT State pavement maintenance program for 2022. An early announcement indicates that the airport will be receiving \$295,000 in additional funding for AIP projects. The conditions and timeline of this grant have not yet been announced.
