Airport Report July 2019

Mowing and turf maintenance operations are ongoing. The weather continues to hamper mowing and farming operations. Airfield lighting repairs, runway inspections and advisories were maintained throughout the month. All equipment received regular scheduled maintenance and repairs.

The 2018-19 pavement maintenance project is now complete. All center line and threshold lines have been repainted. We will continue to plan for future pavement maintenance programs. The fencing repairs are nearing completion. Some of the areas near the eastern portion of the fencing remained wet throughout most of July.

The FAA has indicated that they would like to update the airport ALP before moving forward with any proposed 18-36 construction projects. We are hoping that will provide detailed explanations and reasonable solutions to their recommendations. We are currently reviewing the 5 year advertisement for engineering services required by the Department of Transportation. Every 5 years the Airport is required to advertise, review and potentially interview any companies expressing interest in providing engineering services for the Airport. This will need to be completed before any AIP funded planning or projects move forward.
