

My sister and I are looking to start a youth program for young children. We want to set up a fun positive atmosphere for children to get active and learn fine and gross motor skill developments. Our goal would be to work strength, balance and coordination to help them in the future of any sport they pick.

Parking availability is a concern so I will stress to our customers to drop off and pick up during their kids practice time instead of staying and encourage them to be courteous of neighbor's driveways and houses.

During the school year our classes will run from 3:30 to 8:00 with the occasional classes during the day from 9:00 to noon.

It is an insulated building and there should be no noise complaints, with class sizes of 15 or less children.
