## Airport Report June 2020

Mowing and turf maintenance are ongoing. Airfield lighting repairs , runway inspections and advisories were maintained throughout the month. All equipment , buildings and fencing received regular scheduled maintenance and repairs. Scheduling is underway for the annual DOT Aeronautics pavement maintenance program. Repairs will be completed on runway 18-36 and limited hangar way taxiways. We are also hoping to replace two man hole drains and repair concrete in the same area. A portion of livestock fencing located on the SE portion of the old range was damaged by a vehicle leaving the highway. Scheduling for repairs and reimbursement is underway.

We will be proposing approval of the CARES Act. grant funding . The funding can be used for a variety operational and repair expenses. We will propose using it to reimburse the majority of our 2019-2020 snow removal contract.

The annual CIP (Capitol Improvement Program) meeting was held Tuesday June 30<sup>th</sup>. A review of current 5year projects was presented. Current planning will be a combination of Master planning and possible 18-36 reconstruction 2022. The state has proposed rolling any 2021 funding into the 2022 reconstruction. Beyond that we will be looking at trees , fencing and any other safety issues. Longer range planning includes a new snowblower and apron updates.
